STATISTICS FROM THE 1959 U. S. CENSUS OF AGRICULTURE
IN NEW YORK STATE, BY COUNTIES

CONTENTS

	<u>Page</u>
Farms, land in farms, crop and pasture land.....	1
Farms by size	2
Farms by economic class	3
Specified equipment on farms	4
Cattle, milk cows and milk sold	5
Milk cows by size of herd	6
Poultry	7-8
Horses and mules, hogs, sheep and lambs	9
Grain crops	10-12
Dry beans and potatoes	13
Hay, grass silage, irrigated land	14
Vegetables harvested for sale	15-16
Fruit crops	17-21
Maple sirup	21
Value of sales by commodity groups	22-23
Specified farm expenditures	24
Fertilizer and lime used	25
Operators reporting off-farm work	25

* * * * *

FOREWORD

Many people are concerned with agriculture and use agricultural statistics either as producers, processors, transporters or distributors. Others are engaged in supplying machinery, feed, seed, fertilizer, and other goods or services for farm production.

Although New York State contains a large non-farm population, it is an important agricultural State. New York ranked thirteenth among the states in agricultural importance in 1960 as measured by cash income from farm marketings of crops, livestock, and livestock products.

This report presents selected data from the 1959 U. S. Census of Agriculture by counties in New York. The items included are those most commonly requested by counties. Information on many other items is available in the 1959 Census of Agriculture (county data for New York State in volume 1, part 7) published by the Bureau of the Census, U. S. Department of Commerce. As there were no farms reported for New York County, it is not listed in the following tables.

The 1959 Census of Agriculture was taken by the Bureau of the Census during late October and November 1959. Inventory numbers relate to approximately November 1, and the information on production and crop acreages relates to the year 1959. For the 1959 Census, places of 10 acres or more under the control of one operator or partnership were counted as farms if the estimated sales of agricultural products amounted to \$50 or more in the year. Places of less than 10 acres were counted as farms if the estimated sales in the year amounted to \$250 or more. This Census definition was changed from that of the two previous censuses. The reduction in the number of farms in New York due to change in definition was 3,672.

Farms were grouped into two major categories, commercial and other, mainly on the basis of total value of products sold (page 3). In general, farms with sales amounting to \$2,500 or more were classified as commercial. Farms with sales of less than \$2,500 were classed as commercial if the operator was under 65 years of age and did not work off the farm 100 or more days and the non-farm family income was less than the value of products sold. The remaining farms, including institutional farms, were classified as "other farms". Other farms were in turn subdivided into (a) part-time - sales of less than \$2,500 if the operator was under 65 and he either worked off the farm 100 or more days or non-farm income for the family was greater than the value of products sold. (b) part-retirement - sales of less than \$2,500 and the operator was 65 or older, (c) abnormal - all institutional farms or Indian reservations.

The U. S. Census of Agriculture, taken every fifth year since 1920, provides much detailed agricultural information. In addition however, current information is needed relative to production and utilization of major commodities, prices, and related subjects. The New York Crop Reporting Service, conducted jointly by the New York State Department of Agriculture and Markets and the United States Department of Agriculture, assembles current information from farmers, processors, and handlers, and prepares periodic releases pertaining to agriculture in New York. The statistics in these current releases relate mainly to the State as a whole and serve as useful guides on the current production, prices, stocks, and related facts of importance to New York agriculture. Information as to availability of the periodic releases may be secured by writing the New York Crop Reporting Service, 19th Floor, State Office Building, Albany 1, New York.

Wm. I. BAIR
Agricultural Statistician In Charge

Leading counties for selected items, 1959

Item	First	Second	Third	Fourth	Fifth
Farms	Chautauqua	St. Lawrence	Erie	Steuben	Oneida
Cattle and calves	St. Lawrence	Jefferson	Delaware	Oneida	Otsego
Milk cows	St. Lawrence	Delaware	Jefferson	Oneida	Otsego
Milk sold	St. Lawrence	Oneida	Jefferson	Delaware	Otsego
Eggs sold	Sullivan	Ulster	Orange	Cayuga	Tompkins
Corn for grain, acres	Cayuga	Ontario	Niagara	Wayne	Onondaga
Corn for silage, acres	Oneida	Washington	Madison	Jefferson	Orange
Wheat, acres	Ontario	Livingston	Monroe	Genesee	Niagara
Oats, acres	Jefferson	Steuben	Cayuga	Ontario	St. Lawrence
Dry beans, acres	Cayuga	Livingston	Ontario	Monroe	Wayne
Potatoes, acres	Suffolk	Steuben	Wayne	Wyoming	Genesee
Hay, acres	St. Lawrence	Jefferson	Delaware	Otsego	Steuben
Vegetables for sale, acres	Erie	Orleans	Genesee	Monroe	Wayne
Apple trees	Wayne	Ulster	Niagara	Orleans	Columbia
Peach trees	Niagara	Wayne	Ulster	Orleans	Monroe
Sour cherry trees	Wayne	Niagara	Orleans	Monroe	Columbia

For this project, State funds were matched with Federal funds received from the Agricultural Marketing Service, U. S. D. A. under provisions of the Agricultural Marketing Act of 1946.
